Engineering Review

Statement on Approval Dwgs:

It is understood that sprinkler branch lines, 4" diameter and smaller have already been considered in the total uniform loading given on structural drawings for the joist and girder design. No additional loads or load cases will be considered for joists supporting these pipes. It is recognized that the girder loading given already considers all possible joist reactions from all gravity load combinations and types, and no other additional concentrated loads will be considered. Only mains above 4" diam. pipe will be considered as additional load in joist design. CSC intends to proceed with joist product design in this manner unless instructed otherwise on approval return.

Review Comments to Detailer:

1. Net Uplift per diagrams on S2.31, see below and combine uplift zones as follows.
   - **Mezzanine joists are to be designed with ZERO uplift.** (Detail NO uplift rows.)
   - **For Joist Interior (Zone 1') = -10.5 PSF**
   - **For Joist Perimeter (Zone 1) = -18.0 PSF**
   - **For Joist Perimeter = -27.0 PSF**
   - **For All Girders = -12.8 PSF** (Use for everywhere, do NOT break out for strip.)

2. Use standard end anchorage welds. (K-Series: 1/8" x 2½", LH-Series: ¼" x 2½"). Review required by final design.

3. Equally space bridging between the supports. (Top and Bottom Chord bridging aligned)

4. Rooftop equipment units are shown on the framing plan. These loads are in addition to the joist design and must be transferred to the girder panel points. Please note these loads on the joist and girder BOMs.

5. Section 2/S1.12 indicates joists supporting rooftop units are subject to snow drift loads. Please note these snow drifts, as needed, in addition to the rooftop units on the joist BOMs. These drift loads must also be transferred to the girder panel points.

6. 44LHSP joists between grids B&A and M&N are to be designed for a minimum moment of inertia of 1,450 in^4. Please note this minimum moment of inertia on the joist BOM's.

7. Section 7 & 7A/S4.01 indicates joists at Gridline B will bear on field-supplied bearing for a 'Speed Bay' expansion joint. We will need to adjust clears to accommodate.

8. Per Roof Framing Plan Note 6.E on S2.20, perimeter joists are to be designed to resist rollover forces of 3.25 Kips Wind and 2.0 Kips Seismic along grids A & L. Please note these rollover forces on the joist BOMs.

9. Per Roof Framing Plan Note 6.F on S2.20, ALL joists between grids A&B and K&L are to be designed for axial loads: 4.0 Kips Wind and 7.5 Kips Seismic. These loads appear to be through the joist seats unless noted otherwise.

10. Per Roof Framing Plan Notes 6.I & 7.F on S2.20, joists and girders are to be designed for a live load deflection of L/360 for office areas and L/240 for typical areas. Please note this on the joist and girder BOMs.

11. Per Roof Framing Plan Note 7.A on S2.20, Self-weight of the girders is in addition to design. Please note this on the girder BOMs.

12. Per Roof Framing Plan Note 7.B on S2.20, ALL girders are to be designed for a single 2.0 Kip load at any bottom chord panel point along the girder chords. Please note this on the girder BOMs.

13. Snow drift loads are shown at the roof perimeter, these loads are in addition to the joist design. Please show these loads on the layout drawings and note them on the joist BOMs. Also note the snow drift reactions from the girder panel points as shown on the framing plan on the girder BOMs.

14. OK to assume sprinkler branch lines (4” Ø & smaller) have already been considered in the joist and girder loads shown but MAINS (Greater than 4” Ø) are in addition to the joist design and must be transferred to the girder panel points. See response to approval statement above.

15. Bridging per ESFR Sprinkler Lines, see CAD file in the job reviews folder for joist profiles and include on the layout drawings.

16. Add the following notes to the approval drawings:

    ERECTOR NOTE: Erector, locate bridging to meet fire marshal code clearances required for ESFR sprinkler system function. Bridging location tolerance is +or- 4”. Contact CSC if bridging locations shown on plans or proper clearances cannot be achieved.

    SPRINKLER INSTALLER NOTE: ESFR feeder lines may require slight adjustment from plan dimensions to clear some confined joist web members. Check with Fire Protection designer for limits on amount of adjustment.

    NOTE: Do not use APPROVAL drawings for joist and bridging erection

    SPRINKLER INSTALLER NOTE: ALL sprinkler mains, 4” and larger, shall have connections to joists be hung concentrically achieved by loading thru the center of gravity of a single joist and/or by trapeze type hanger. Side mounting mains to a single joist is prohibited.

17. OK to modify our field strut detail to match the section 7/S1.11 and show a max allowable distance of 4” for a concentrated load to occur away from a panel point before a field strut is required. No approval statement required for this.

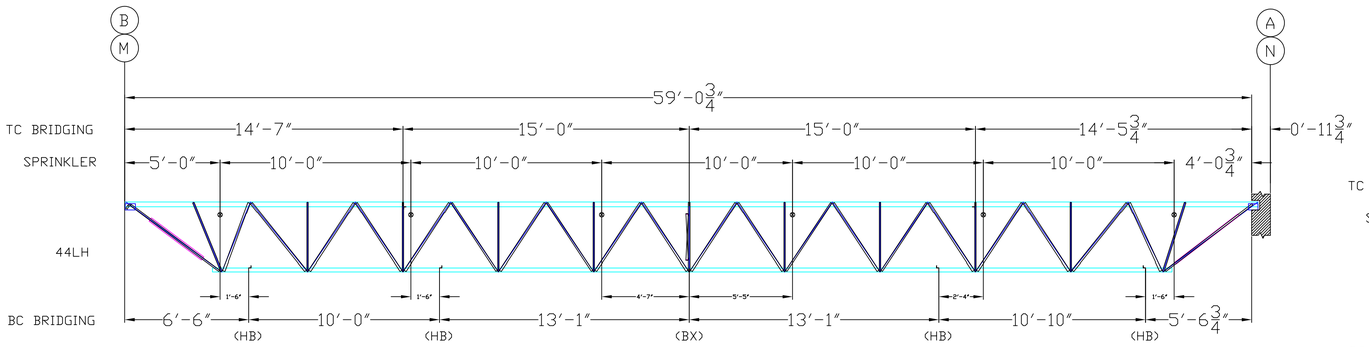
Design/ Engineering notes:

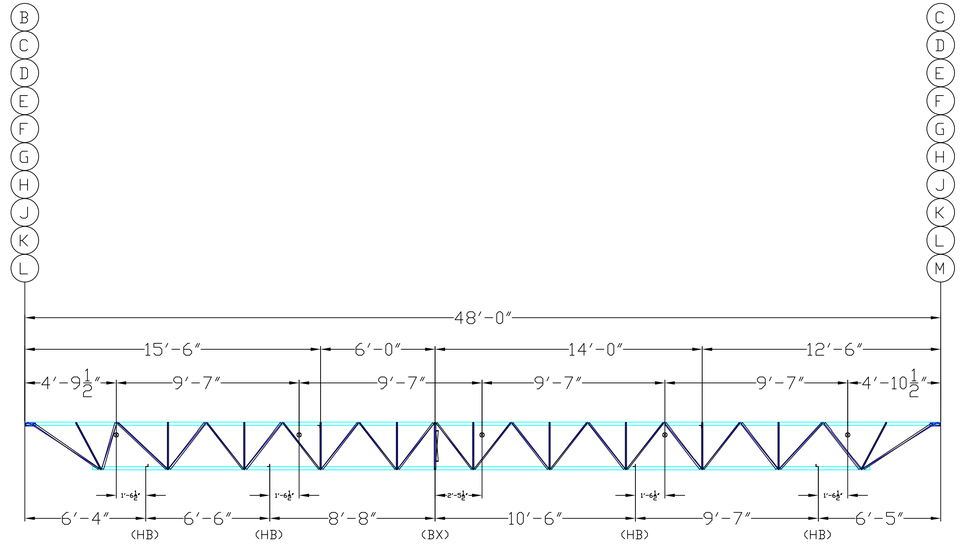
1. Steffy Project – Make sure to adhere to all design standards including special joist grouping by requisition:
   - The Tie Joists (TJ's) should be in a req separate from the 'infill' joists. The req's for the infill joists need to have a note on the cap sheets for 'Bundle in groups of 8, or 4 and 4'.... or Bundle in groups of 7, or 3 then 4'.

2. Girder self-weight is in addition to design. Apply self-weight to girder bottom chords.

3. See above & returned approvals.

ESFR Profiles

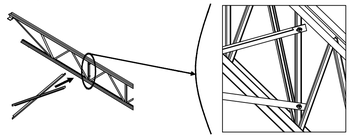




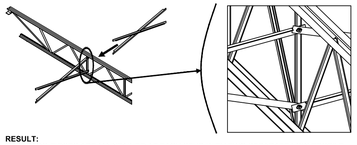
CROSS-BRIDGING STUDS SYSTEM

EACH CROSS-BRIDGING (X-BRDG) SET HAS TO BE INSTALLED AND BOLTED SEPARATELY.

STEP 1 : INSTALL THE FIRST X-BRDG SET TO THE JOIST WITH TWO LOW PROFILE NUTS. (NO WASHERS RQD AT LOW PROFILE NUTS)



STEP 2 : INSTALL THE SECOND X-BRDG SET ON THE OTHER SIDE OF THE JOIST WITH TWO ADDITIONAL LOW PROFILE NUTS (NO WASHERS ROD).



RESULT:
TWO BRDG PIECES ARE MAINTAINED AT EACH STUD WITH TWO SEPARATE LOW PROFILE NUTS. A CROSS-BRIDGING (X-BRDG) SET IS INSTALLED ON EITHER SIDE OF THE JOIST.

NOTE:
LOW PROFILE NUTS ON ½" DIAM. STUDS REQUIRE 7/16" SOCKET.

LOW PROFILE NUTS ON ½" DIAM. STUDS REQUIRE ½" SOCKET.

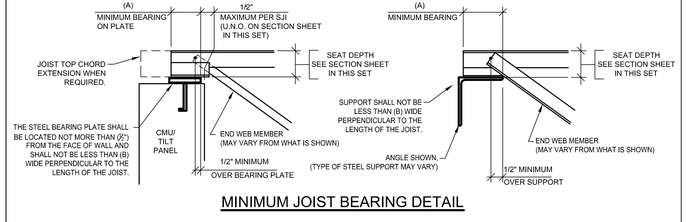
* SOMETIMES THE DESIGNS FOR THE JOIST BEARING SEATS MAY REQUIRE WIDER SEAT MATERIAL THAN THE MINIMUM BEARING SUPPORT WIDTHS SPECIFIED ON THIS DETAIL. THEREFORE, IT IS RECOMMENDED THAT YOU CONSULT W/ CANAM PRIOR TO FABRICATION OR INSTALLATION OF JOIST BEARING SUPPORTS TO CONFIRM BEARING WIDTH REQUIREMENTS.

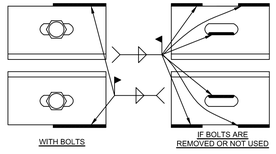


MINIMUM JOIST BEARING DETAIL

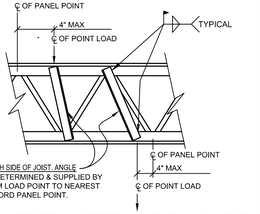
SEE THE PROJECT SPECIFIC SECTIONS WITHIN THIS SET FOR EXACT JOIST PLACEMENT. THIS SECTION CONVEYS THAT SJI MINIMUM BEARING LENGTHS AND TYPICAL WIDTH ALLOWANCES SHALL BE RESPECTED UNLESS SPECIFICALLY COORDINATED OTHERWISE WITH CANAM.

ERECTOR NOTE:

JOIST SEATS FABRICATED TO ALLOW FOR BOLTED ANCHORAGE ALSO REQUIRE A FINAL WELDED CONNECTION, BUT THE BOLTS SHALL BE INSTALLED. IF BOLTS ARE NOT INSTALLED, AND IF PERMITTED BY THE EOR, THEN THE INSIDE EDGE OF THE SEAT SLOTS MUST BE WELDED, AS SHOWN. ADDITIONAL WELD AS REQUIRED TO MEET THE TOTAL SPECIFIED SHALL BE PLACED AT A LOCATION ON THE EDGE OF THE SEAT AWAY FROM THE OUTER EDGE OF THE SLOT.



BOLTED JOIST CONNECTION DETAIL



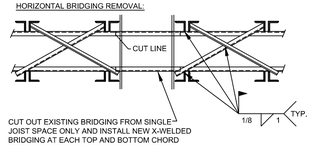
FOR NOMINAL CONCENTRATED LOADS BETWEEN PANEL POINTS, WHICH HAVE BEEN ACCOUNTED FOR IN THE SPECIFIED UNIFORM DESIGN LOADS, A "STRUT" TO TRANSFER THE LOAD TO A PANEL POINT ON THE OPPOSITE CHORD SHALL NOT BE REQUIRED, PROVIDED THE SUM OF THE CONCENTRATED LOADS WITHIN A CHORD PANEL DOES NOT EXCEED 100 POUNDS AND THE ATTACHMENTS ARE CONCENTRIC TO THE CHORD.

TYPICAL INSTALLATION DETAIL FOR:

JOIST REINFORCEMENT AT CONCENTRATED LOADS

REFERENCE: 7/S1.11

HORIZONTAL BRIDGING REMOVAL:



CUT OUT EXISTING BRIDGING FROM SINGLE JOIST SPACE ONLY AND INSTALL NEW X-WELDED BRIDGING AT EACH TOP AND BOTTOM CHORD BRIDGING ROW LOCATION ON EACH SIDE OF OPENING AS SHOWN ABOVE. IF DECK IS IN PLACE, NEW X-WELDED BRIDGING IS ONLY REQUIRED AT BOTTOM CHORD BRIDGING LOCATIONS.

NOTE:
X-WELDED BRIDGING SHOWN ABOVE IS NOT BY CANAM.

BOLTED X-BRIDGING REMOVAL NOTE:
AFTER JOIST ERECTION BOLTED X-BRIDGING MAY BE REMOVED FROM A SINGLE JOIST SPACING. IF BOLTED X-BRIDGING REMOVAL IS REQUIRED IN TWO CONSECUTIVE JOIST SPACINGS CONTACT CANAM ENGINEER.
